SUMMARY

Hey Folks!!

This is Parth Madhvani, an Information Technology undergraduate, pursuing a B.Tech from A D Patel Institute of Technology, Anand. I am always fascinated by programming and passionate about exploring the latest technology and developing new cool and innovative products. I am an enthusiastic and curious individual who works hard and is highly ambitious in improving my knowledge of real-world applications.

I am a Front-End Developer, and UX Designer, I enjoy building applications while creating feasible design systems. My deep understanding of front-end application structure and architecture allows me to build unique products using core principles.

In terms of technical skills, I work with Javascript and Typescript on a daily basis, both professionally and on personal projects. I have actively participated in various hackathons and taken part in the community to help with community building, team leadership, and different methodologies in developing software.

SKILLS

- languages : C / C++, Javascript, Data Structures ,Competitive Programming
